

My Pledge to YOU...

★ I Work For You ★

As your Councilman,

I pledge to bring financial responsibility to your city government. You will see complete transparency and greater efficiencies in your city finances. I will advocate for the reduction of elected officials' compensation by 20%. The status quo will say it can't be done... I beg to differ.

I pledge to bring a professional business presence to your City Council focused on stimulating new economic development along with a continued dedication of support for our existing business community. With 33 years of business management experience, and as a local business owner of 22 years, I understand the importance of hard work and communication.

I pledge to continue to work to unite our community with the collaborative efforts of the many charitable and non-profit organizations in our community that benefit all residents. It is here that all volunteers serve, it is here that I have demonstrated my desire to put you, the residents, first.
